

SAMI WAEL NABHAN

Full Stack Developer

ABOUT ME

Full stack developer from Gaza. I build web systems with Laravel, React and Angular, from the database and APIs to the interface. Four years in ISP technical support taught me to solve problems fast and think about the end user.

EDUCATION

Bachelor of Software Development

Islamic University of Gaza

EXPERIENCE

- Full Stack Developer** 11/2025 – Present
Arab & Intl. Org. for Construction in Palestine
 - Build web systems with Laravel, Blade & Tailwind CSS.
 - Develop Angular front-ends connected to Laravel REST APIs.
 - Use Vite for fast builds and optimized front-end assets.
- Technical Support Specialist** 06/2019 – 10/2023
Speedclick ISP | Gaza, Palestine
 - Resolved connectivity issues (fiber, ADSL & wireless) by phone and on-site visits.
 - Installed and maintained wireless Wi-Fi networks and microwave links.
 - Supervised a team of university trainees during field training.

PROJECTS

- **ISP CRM System** – manages subscribers, service plans and network control for internet providers in one dashboard.
- **ERP System** – runs a company's daily operations, with modules for users, roles and permissions.
- **Financial Systems** – invoices, payments, accounts and financial reports with full transaction history.
- **Solar Management System** – water & electricity billing, recharges and balance tracking for subscribers.
- **GIS & Maps** – interactive maps that display locations and field data directly inside web apps.
- **E-commerce Stores** – online shops with full admin dashboards.
